

Introduction

Egreen solution is developing company working in renewable energy can reduce the cost of energy drastically as compared to the present conventional grid power and diesel generators. Most of the financial institutions are financing the renewable energy projects. The savings obtained from renewable energy can pay off the financing cost.

Solar energy is affordable if designed and applied properly according to location, energy requirements, types of loads, future expansion plans and your budget. By considering the above points, a customized solution can offer you the best solution and savings.

With our strong team and partnerships, we offer you the range of solutions to fulfill your energy requirements within your budget.

Who are we?

We Egreen solution is one of the prominent emerging companies in the field of renewable energy technology, which is a one stop solar Water Heater & PV solution for all of your energy needs.

We have the expertise in solar PV systems design, installation and commissioning. Our strong team members and partnerships having decades of experience in this area of technology, promise you the best possible solution.

We offer range of solutions for residential, commercial and industrial applications. We will help you to choose between the technologies and products, which are the best match for your energy needs to make the project technically feasible and economically viable.

PRODUCTS AND SOLUTIONS

Solar Water Heating System

Solar Water Heating (SWH) is the conversion of Sunlight into Heat for Water Heating using a solar thermal collector and ETC. A variety of configurations are available at varying cost to provide solutions in different climates and latitudes. SWHs are widely used for residential and some industrial applications.

Solar Collectors that can reliably convert >90% of available Sunlight for domestic Hot Water supply. A solar water heater is one of the most effective ways of cutting a

household's carbon footprint by reducing reliance on dirty fossil fuel usage. By offsetting the use of electricity, gas or heating oil, using solar water heaters can also provide financial savings by reducing energy costs.

COMMERCIAL AND INDUSTRIAL

Solar LED Street Lights

Using solar energy provides a very efficient solution for street lighting. Solar powered outdoor lighting products are very ideal for lighting the area in remote locations, common area lighting in societies, townships and garden lighting. The system is of great usage to reduce dependency on unreliable grid power and also helps to reduce the carbon footprints.

It has robust structure, low maintenance and comes with automatic dust to operation.

Solar water pumps

Water pumping is a basic need to irrigate the agriculture as well as it is necessary in manufacturing and process industries. Nowadays for farming load shedding is major problem in most of the regions which adversely affect productivity. Solar PV has become an attractive source of energy for pumping which is reliable, pollution free and economical from the perspective of lifecycle cost.

Suitable system for existing pumps can be designed according to the pump type and total head.

Solar Rooftop PV systems (Grid tied and hybrid)

Most of the commercial establishments and manufacturing facilities have their rooftop open and unused. These areas can be effectively used to install solar system which will give power to your offices and manufacturing floors. The commercial and industrial rates of electricity are very much higher. By adopting PV system you can drastically reduce the cost of energy.

Grid tied systems doesn't need batteries, hence has attractive payback period. This system will take energy first from solar PV and if still there is a need of energy then it will allow taking it from conventional grid. You can choose to run partial or full load on solar PV.

Regular LED Street Light Poles

We are proclaimed by our clients as major supplier of superb quality **Lighting Poles**. These poles fabricated by using fine grade materials and high-end technology, are well known for superb strength and high toughness. Available with us in wide specifications, these poles are highly rust proof and are offered to customers at pocket-friendly rates.

Feature: Superb finishing, Rust proof, highly robust.

Our Installations: we have more than 500 installation in solar and pv system in various Sectors. Major Client in Pune – **Ceratech City-Katraj**, **Unique Group-Pune**, **Swastik**

Developers-Katraj, **Lipane Properties- Jambulwadi**, **Indraprashta**

Developers-Katraj, **Mahalaxmi**

Developers-Sangvi, **Pune**, **Bafna Bulders - Bibewawadi**, **Ma-Pranam**

Buider and Dev- Yewalewadi, **Pune gate Hotels- Sihagad Rd-Pune.**

**Rooftop capacity -25kw on Grid Karvenager Pune
60kw**

Rooftop On Grid System Kotling Enterprises -

Rooftop On Grid Dhule Hospital -25kw

Rooftop On Grid Delta Engineering -15kw

Modern Engineering works -120KW

Eagle Burgmann India Pvt Ltd - 200KW

BHAGAWATI INDUSTRIES - 140Kw

Rudra Hotel Karve nagar - 30kw

ARYA Residency, Vadgaon – 35kw

Kotling Industries ,MIDC Bhosari – 60kw

RAJ METAL INDUSTRIES ,Katraj 35kw

BETULNUT RESORT diveghar - 30Kw

Our Valuable Industrial Commercial Client :

Kotling enterprises

**Bhagwati Industries
palus**

**Modern Engineering
Works Nimsakher**
