E Green Solution

BEYONDSEO LIVE WEBSITE AUDIT REPORT (V2.8.0)

Target Domain: https://www.egreensolution.in/
Audit Date: 4 November 2026
Auditor Engine: BeyondSEO Editorial Audit Suite

39	100%	896	87.2%
LIVE PAGES AUDITED	HTTP 200 AVAILABILITY	AVG WORDS / PAGE	SCHEMA STRUCTURED DATA

P1 Critical Finding (Live Vercel Site): The live deployment on Vercel serves `canonical` link tags pointing to the apex domain (`https://egreensolution.in/`) while users and search engines browse the `www` host (`https://www.egreensolution.in/`). This splits PageRank and Google Search Console data.
Remediation Status: All 39 canonicals have been **remediated locally in Git** to strictly declare `https://www.egreensolution.in/`. Running `git push origin main` in your terminal will deploy these canonical fixes instantly to production.

Content & Technical Strengths: E Green Solution possesses substantial technical solar depth compared to competing Pune solar installers. High-authority comprehensive guides exceed 1,500 to 1,900 words, backed by 30 distinct Schema.org classes including `FAQPage` (27 pages), `LocalBusiness` (21 pages), and `BreadcrumbList` (34 pages).

Priority Action Roadmap

1. **Deploy Local Commitments:** Execute `git push origin main` to publish the unified `www` canonicals, updated official logo, dual installation calculator, and 2 new problem-solution blogs.
2. **Google Search Console Sitemap Submission:** Resubmit `https://www.egreensolution.in/sitemap.xml` in GSC to accelerate indexing of updated canonicals.
3. **Contextual Blog Inlinks:** Add 2–3 contextual links from main service pages to blog guides (e.g., link Housing Society guide from Residential Solar).
